background

Central Vacuum Cleaners

Think Smart Built-in Systems is a family-owned business in South Africa, with more than ten years experience in the building industry and was established in 2006. We start to import central vacuum systems from Canada after reading studies that show a measurable improvement in indoor air quality when vacuum systems which exhausted air outside the home. We realise that noisy conventional portable vacuum systems are an effective in vacuuming allergic and toxic household dust from the home or work place and that built-in central vacuum systems is a superior means of cleaning and vacuuming indoor dust.

Whole House Water Filtration Systems

Being very health conscious we start importing and installing water filtration systems in 2012, after reading recommendations by the Silent Spring Institute, the only nonprofit scientific research organization specifically dedicated to breast cancer prevention, that water filtration systems can help prevent breast cancer.

Solar photovoltaic (PV) energy and solar water heaters

We are also partnering with carefully selected established solar installers and suppliers, with many years of experience in the solar industry to ensure successful needs analysis, system design, installation, commissioning and the ongoing management and maintenance of installed systems.

Did you know?

The future of solar power has looked increasingly bright in recent years thanks to the plummeting cost of silicon solar panels and a global push for clean energy sources to address climate change. In the most optimistic scenarios for the power source, solar generation will increase 16-fold between 2016 and 2040, according to data from the International Energy Agency.

Our clients include, private homes all over South Africa, various factories, and international industries.

Contact us for countrywide installations and deliveries.

Situated in Pretoria with agents nationally.

Our international supplier for central vacuum systems, Drainvac in Canada, has been specialist in residential, commercial and industrial central vacuum systems for 35 years and has an extensive network of distributors in more than 30 countries worldwide.

Our solar products supplier, SegenSolar (Pty) Ltd. is part of the Segen Ltd group, the UK's largest PV wholesaler and distributor.

SegenSolar offers an unrivalled service distributing photovoltaic solutions in South Africa and Africa for grid-tied, off-grid and hybrid systems.

To make a difference in the health and lifestyles of those we serve.

vision

To bring comfort and hygiene to every house, company and office in South Africa with superior performing products. Clean energy air and water in homes and offices are not only essential, but make sense.

mission

Think Smart Built-in Systems choose to embrace the following values:

- Loyalty
- Integrity
- Respect
- Excellence
- Courage
- Responsibility
- Awareness

values

our business

Think Smart Built-in Systems import, distribute and install central vacuum systems as well as Whole House Water filtration systems. We cater for the discerning customer and offer the most advanced and widest selection of central vacuum systems (more than 50 models) on the market. This includes wet and dry, automatic, commercial and industrial models. Our Whole House Water filtration systems can be installed in both residential homes and offices.

These systems are available for a DIY project or you can get the assistance of a contractor. Think-Smart offers complete maintenance on our products, making it hassle-free for our customers.

Business goals and objectives

Giving our customers effective and quick service. This includes doing what is the best for them and assisting them in making the right product choices.

Business activities

Think Smart Built-in Systems import, distribute and install:

- Central vacuum systems for the residential and commercial market; and
- Point of entry (POE) and Point Of Use (POU) water filtration systems for residential and office use.
-

Unique equipment or specialties

- We cater for the discerning customer and offer the most advanced and widest selection of central vacuum systems on the market. We are the only company in South Africa that supply wet and dry central vacuum systems.

Certifications

- Our Central Vacuum systems are CE certified and Green Approved by the National Green Building Certification; and
- We also import only NSF (National Sanitation Foundation) certified filtration media and filtration systems.

solar products

Residential and Commercial Solar Photovoltaic (PV) Systems

For many years, Think Smart Built-in Systems has built a solid reputation of successfully delivering clean solutions for commercial businesses and residential homes across South Africa.

Think Smart Built-in Systems ensure successful needs analysis, system design, installation, commissioning and the ongoing management and maintenance of the system in conjunction with our partners with many years of installation experience.

Our local suppliers from the UK and Germany are differentiated proven, use only tier 1 solar panels and financially stable manufacturers in the solar industry, giving you peace of mind that your solar module supplier will be around in the future. All Tier 1 manufacturers have stringent quality controls in place to check their products for faults like hot spots, which are a widely known phenomenon.

Solar Water Heaters

Solar water heaters use the sun's free energy to heat water. Our high quality systems allow homeowners and businesses to save up to 65% of their electricity bill. We carry all types of solar water heaters including direct and indirect, pressurized and non-pressurized, split or integrated, flat panel and tube.

Solar Water Pumping

Solar water pumps are great for irrigation and other water supply needs. We have submersible pumps and surface pumps that can be powered by the sun.

products

Point Of Entry (POE) Water Filtration Systems

Main features:

- Low maintenance
- Chemical free water from every water source in the house
- Backwashing prevents channeling of the carbon media
- NSF Certified carbon media

Imagine clean chemical free water from every tap in your house

Point Of Use (POU) Filtration Systems For Offices And Homes

Main features:

- Low maintenance high flow system
- Backwashable
- Will NOT leak water
- Eco friendly and easy to install
- Remove or reduce sediment, heavy metals, chlorine, bad taste, chemicals linked to cancer, pesticides, insecticides, (VOC's), PCB's, bacteria, viruses, algae

The GREEN water filtration solution - FILTER YOUR OWN WATER

products

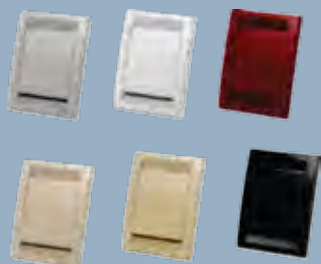

Central Vacuum Cleaners

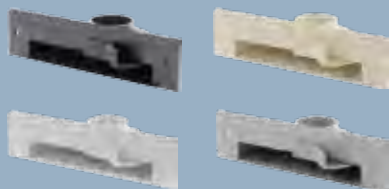

Our range

Vacuum inlets

Vacpans

WallyFlex

Main features:

A range to satisfy any request

- ▶▶ Systems that vacuums both solids and liquids
- ▶▶ Automatic systems connected to your drain that requires virtually no maintenance
- ▶▶ Above-average soundproofing
- ▶▶ Designed to meet the stringent requirements of the commercial and industrial sectors
- ▶▶ Energy saving high efficiency motors
- ▶▶ Low maintenance units
- ▶▶ Easy connection professional units
